Cost of Road Crashes (Non Metropolitan Authorities) 2012-14

Non-metropolitan authorities have been defined where the rural population accounts for at least 25% of the total.

Authorities have been removed where the total traffic volume fell into the lowest 10% of all road authorities.

All fatal and serious crashes between 2012 and 2014 have been assigned crash costs from the “total value of prevention” costs defined by the Department for Transport.

Economic loss per capita is the total economic loss per authority divided by the total population.

Economic loss per travel is the total economic loss per authority divided by the volume of traffic.

The colours given in the table are ordered from lowest in green to highest in red.

Authority	Economic loss (£m) 2012-14	Estimated population mid-2013 ('000s)	Economic loss per capita (£)	Traffic (billion vehicle km)	Economic loss per travel (£ per thousand veh km)
Hampshire	642	1338	480	43.9	£14.6
Kent	604	1494	404	42.7	£14.1
Essex	545	1416	385	41.4	£13.2
North Yorkshire	461	603	765	23.3	£19.8
Lincolnshire	438	724	605	17.5	£25.1
Norfolk	404	870	465	23.9	£16.9
West Sussex	400	821	487	20.7	£19.3
Nottinghamshire	367	796	461	20.8	£17.6
